## **PathSolutions Becomes an Avtex Network Infrastructure Partner**

### **PathSolutions' Network Performance Management Solutions Enable Reliable and High Performing VoIP and Data Networks for Avtex Customers**

SANTA CLARA, Calif.--([BUSINESS WIRE](#))--PathSolutions, a network and VoIP performance management solution provider, announced today that it is an authorized Avtex Network Infrastructure partner. Avtex, a Minnesota-based and nationally recognized applications and systems integrator, specializes in Contact Center, IP Telephony, Messaging, Notification and Networking Solutions that enable businesses to embrace their customers.

Bob Denman, President of Avtex, states, "We select our partners based on the benefits and value that they can deliver to our customers. PathSolutions' network performance management solutions offer our customers unprecedented visibility into the performance of their networks, continuously monitors for and identifies any network issues, and recommends fixes for those issues. From a value and performance standpoint, we consider PathSolutions to be the best in its field."

As a leader in providing telephony, data and business process automation applications, Avtex works closely with its customers to deliver solutions that meet their needs today and into the future. This strong customer-centric focus enables Avtex customers to survive and thrive in today's competitive business environment.

"We are pleased to be part of the extended Avtex partner family as we, like Avtex, are committed to delivering high quality solutions to our customers. We believe that our VoIP and data network performance management solutions offer tremendous value to Avtex customers and their network infrastructures, ensuring the reliable and high performing networks required for Unified Communications solutions," said Tim Titus, CTO of PathSolutions.

PathSolutions' Total Network Visibility solutions represent a new direction in network performance monitoring by changing how engineering effort is utilized. Its solutions for VoIP and data networks act as the network's eyes and ears, automatically monitoring the health and performance of every switch, router, server, and link in data or VoIP networks of any size. In addition, PathSolutions VoIP Monitor is the only solution that identifies where and why a VoIP call went bad, and then recommends a fix. With PathSolutions' network performance management solutions, problems are easily identified and quickly diagnosed. This allows engineers to spend their valuable time resolving problems instead of installing and configuring software.

### **About Avtex Solutions, LLC**

Avtex, a leading unified communications solution provider, specializes in development, design, deployment and support for multimedia contact center, IP telephony, messaging, enterprise-wide collaboration, emergency notification and network solutions. An Interactive Intelligence Platinum Elite Partner; Microsoft Certified Gold Partner; and certified with world class networking companies, Avtex staff include software developers, systems engineers, network engineers, system design consultants, project managers, customer support personnel, field technicians and consultants.
